

Detector Request Information

The Columbia County Fire Chiefs' Association Fire Safety and Prevention Committee ,FEMA, and the National S.A.F.E. Home Foundation has teamed together to provide a cache of smoke detectors with batteries that are available to Columbia County fire companies.

It is our intent to provide smoke detectors to families with young children, seniors, and people that are in need. We need your help to make this important live saving project a success. The rules are simple. Requests for smoke detectors will go through your fire department. Upon receiving a request, provide a battery operated smoke detector to the County resident with the information packet provided. The only important thing that we request is that the questioner be filled out at the time of distribution and sent back to the Chiefs' Association so that we may track our target groups.

While we do not currently have any in stock, we will review on a case-by-case basis requests for special needs detectors. ie: hearing impaired.

Requests for the detectors must be in writing on company letterhead by a chief officer explaining the number of detectors and reason for the request. Request may be sent to:
